

# Ziemer defines the Standard in Anterior Segment Tomography – Again!

Ziemer is proudly introducing the all new  
**Dual Scheimpflug Analyzer**

## GALILEI™ G2

- Scan a complete eye exam in less than one second
- Complete report and maps on your monitor in less than 30 seconds
- Over 40 different, customizable maps, reports and displays
- Large and bright monitor displays crisp, detail-rich maps and images
- Improved handling for easier data-taking and processing

### **New. Faster. The Fastest.**

And like the vintage GALILEI, the new G2 is the only Dual Scheimpflug / Placido system capable of merging and ray-tracing all data into a 3D reconstruction of the cornea and anterior chamber, delivering superior accuracy in elevation, curvature, pachymetry, total corneal power and anterior chamber biometry.

**GALILEI™ G2** - Advanced Solutions  
for Cataract and Refractive Diagnostics
